## PROFILE

Sound designer finishing a Bachelor of Film at the Academy of Interactive Technology in Melbourne, specializing in Film and TV Post-Production. Before moving into screen sound I spent two years producing, recording, and mixing music for independent artists. This experience taught me how to listen critically and solve problems under a deadline. I'm looking for an internship or entry-level opportunities where I can bring that same care to dialogue, effects, and mix work on film and television productions.

## SKILLS

### Sound and post-production

- Sound Design
- Dialogue Editing
- Sound Effects Design
- Foley Recording and Performance
- Field Recording
- Audio Mixing and Mastering
- Audio Restoration and Noise Reduction
- Audio Synchronization.

### Software tools

- Pro Tools
- Logic Pro
- Ableton Live
- Cubase
- Adobe Premiere Pro

## EXPERIENCE

### Freelance Sound Designer & Music Producer

Self-Employed, Kenya

2022 – 2024

- Produced original instrumentals and backing tracks across multiple genres for independent artists, working from a first brief through to a finished, release-ready track.
- Recorded and edited vocal performances, then mixed and mastered each project to a commercial standard.
- Built custom sound effects and audio textures from scratch to give tracks a distinct sonic identity, rather than relying on stock samples.
- Owned the client relationship end to end briefing, revisions, and deadlines.
- Kept sessions and audio assets organized well enough that revisiting an old project never meant starting from scratch.

## PROJECTS

### Black Studio Production

#### Music Production (Personal Portfolio Project)

- Produced a cinematic instrumental composition from concept to completion, handling composition, sound selection, arrangement, mixing, and mastering independently.
- The project demonstrates my ability to create immersive soundscapes, balance complex audio layers, and deliver a polished production while maintaining an organized workflow throughout the creative process.

### Personal Sound Design Studies

- Self-directed exercises in field recording and Foley replacing sound effects in short scenes to practice matching sound to picture, and building a soundscape from nothing but a location and a microphone.

## EDUCATION

**Bachelor of Film** Academy of Interactive Technology (AIT), Melbourne  
*2023 – 2026*

- **Specialization:** Film and TV Post-Production
- **Coursework:** Sound Design, Audio Post-Production, Film Production, Cinematography, Editing, Screen Storytelling, Production Workflows

## REFEREES

Available upon request.
